PASSENGER RAIL AGENCY OF SOUTH AFRICA

	CONTRACTOR	
	Fire Protection and CCTV installations at Electrical rooms	
	08/10/2026	
	JOHANNEBSURG PARK STATION	

1. PROJECTS

Fire Protection and CCTV Installation at Electrical Rooms

2. BACKGROUND

Installation of fire detection, protection system and CCTV cameras within the critical electrical substations and newly built generator rooms at Johannesburg Park Station. The purpose of the service is to secure and protect the electrical substation and generator rooms against fire and vandalism. Generators rooms and substation distributions boards were recently vandalised affecting the commissioning of newly completed hub1 generator rooms.

3. SCOPE OF SERVICES

The scope of work for installation of fire detection, protection systems and CCTV cameras is as stated below but not limited to,

- Installation of Fire protection at Hub 1 and Hub 2 generator rooms.
- Installation of fire preventative systems.
- Installation of CCTV at Hub 1 and Hub 2 generator rooms including substations.
- Connection the monitoring of the system in the centralized control room
